

## ***Stitch-A-Wish***

benefiting **Cook Children's Medical Center** in Fort Worth, Texas

### **ACTIVITY APRON**

Activity Aprons are used by the Transitional Care Unit (inpatient rehab) for children in wheelchairs. They have ties, buttons, Velcro, zippers, etc., that they can “play” with while being therapeutic at the same time. These aprons tie at the waist and lay across the patient’s lap. Making the ties a little longer will allow the therapists to tie the apron around to the back of the wheelchair if necessary.

***Thank you!!***
