

HALO PILLOW COVERING

This may not print in the exact size you will need as all printers are configured differently. Please use this as an example of what the end result should look like.

It should be roughly a 7 1/4 inch diameter circle, tapered down to about a 5 inch opening.

Cut two pieces, turn right sides together and stitch a 1/4 inch seam around all sides except for the tapered opening. Turn right sides out and finish off the tapered opening with Velcro.

Please use flannel or soft cotton.

THANK YOU !!!
